Part Number Supersession

Situation

Mercury's implementation of our new order entry system has changed our part number format eliminating lead and embedded spaces from our part numbers in our order entry system. As we have removed these lead and embedded spaces, it has caused some part numbers to be duplicated. To resolve this issue, we have issued new part numbers for parts in this situation.

NOTE: Part numbers that have been duplicated will have this bulletin referenced in their part description. MercNET will have additional information directing you to the correct item in the additional description section of your order entry screen or in item attachments.

Correction

Below is a cross-reference of Old to New Part numbers.

Old Part	Description	New Part	Old Part	Description	New Part
