3" Fuel Filler Kit

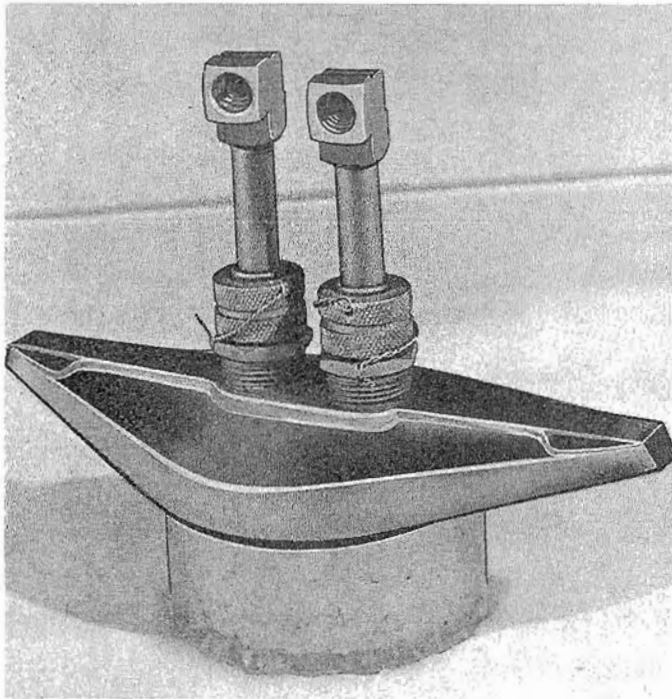

Figure 1. Fuel Filler Kit Installed

3" FUEL FILLER KIT

A special 3" Fuel Filler Kit (C-36-46103A1) is available for special fuel tanks with single or dual engine installation.

The kit consists of a coupling to be welded to the fuel tank (Figure 1), twin fuel pickups (Figure 2) and fuel cap.

The kit is ideal for special applications, such as large boat fuel tanks and racing boats. The pickup depth is adjustable to 27" or can be cut to fit more shallow tanks.

Vibration-proof . . . proved excellent for competition! Eliminates bottom tank connections and fittings, thus eliminating leaks in line. If a water problem is encountered in fuel, the pickup may be pulled up.
