## Warranty and Registration of Unsold Non-Current Mercury Racing Outboards

### Non-Current Outboards

The following inspection, preparation and warranty registration is required to ensure that new, unsold non-current Mercury Racing Outboards are in good operating order and warrantable condition prior to customer delivery.

- Correct any items found defective.

### 1-2 Model Years Non-Current

- Complete inspections and preparations per the Pre-Delivery Checklist.
- Complete and submit the warranty registration.

### 3-5 Model Years Non-Current

1. Inspect outboard for damage, deterioration and corrosion.
2. Drain and refill gear lube.
3. Replace water pump impeller and lubricate driveshaft and propshaft splines.
4. Inspect all fuel lines, fuel pump gaskets and spark plugs. Check oil injection oil lines, if equipped.
5. Lubricate tilt tube and swivel bracket.
6. Spray lubricant into cylinders and crankcase before operating outboard.
7. Operate outboard and check for leaks and proper functioning of all items.
8. Complete inspections per the Pre-Delivery Checklist.
9. Complete and submit the warranty registration per current instructions.

### Warranty

Not Covered by Warranty
Parts and labor to prepare 3-5 model years non-current
Concealed shipping damage on 3-5 model years non-current

### 6 or More Model Years Non-Current

- Mark bill of sale "Sold Without Factory Warranty" and complete registration of the product.
- Complete service items 1 - 8 from the 3-5 Model Years Non-Current List
