

Force Tachometer Part Number F5H167-2 (5H167-2)

This bulletin is to clarify which selector switch setting to use when installing the F5H167-2 Force tachometer. On the back of the tachometer is a selector switch which allows this tachometer to be used with various Force engines. Set the selector switch prior to installation. See illustration. Settings 3, 4 and 5 are not used on the Force products.

a - Selector Switch

Position 1 - For 20 Pole Alternator (Prestolite Ignition Only)

Position 2 - For 12 Pole Alternator (Thunderbolt Ignition and ALL 35 HP Force Engines)
